

The Last 6,000 Campaign

a civic campaign to locate Seattle's remaining majestic trees
Summer Newsletter

Our Summer Newsletter features a selection of the over 1300 majestic trees submitted from every Seattle neighborhood as part of our year-long ongoing campaign. We have some of the tallest tree species of any city in the country here. We hope these images of Seattle's majestic trees towering tall can be a source of strength, endurance, and wisdom in these times of trial and challenge.

Douglas Fir/Central District

Giant Sequoia/Beacon Hill

The Last 6,000 Campaign

Summer Newsletter

Our tree census is ongoing - We are counting on our citizen scientists to help us find more in the next few months. On your next social distancing walk through your neighborhood, please take a moment to search for trees that you can enter into our database www.thelast6000.org

We have reached another milestone: 1000+ Instagram followers! Our Instagram followers have been so helpful in not only submitting trees but also documenting beautiful trees they come across in Seattle, sharing photos for our seasonal challenges and even reporting tree concerns. More importantly, they share with others who may not know about us and as a result, help spread the news of the good work we are doing. Thank you IG followers and if you aren't yet following, you can find us at @TheLast6000.

Deodar Cedar/Greenwood

Cottonwood/Eastlake

Red Cedar/Rainier Valley
